

A 21st Century Solution to Your Time Sheet Paper Chase

Tired of Scrambling Around the Province Collecting Paper Time Sheets at Payroll Cut-off?

Introducing Logger's E-Time

Caribou's "Logger's E-Time" is a web-based electronic time sheet system that integrates directly with your *Logger's Edge* back-office software system.

Field workers use a laptop or tablet to enter their time sheets.

Supervisors review and approve the time sheets, on-line.

Upon approval, these time cards are visible and available for correction and processing in *Logger's Edge*.

It's that easy!!!!

Configurable Time Sheets

Collect as Much or as Little Data as You Need to Manage Your Business

- Employee
- Date
- Block
- Activity
- Equipment
- Uptime
- Down-time and Reason
- Travel Time
- Kilometers
- Living out Allowance
- Fuel & Fluids

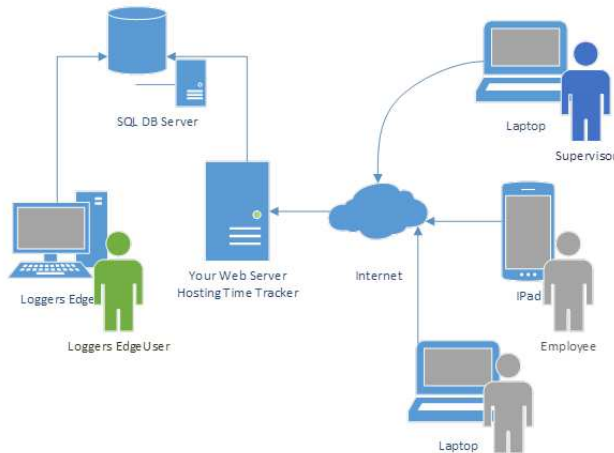

What Makes Logger's E-Time Such an Obvious Next Step?

- Skip the paper, and enter time sheets electronically the day the work is done.
- Eliminate the costs of wasted gas and time spent collecting time cards from remote workers.
- Eliminate expensive pre-printed time-sheet books.
- Eliminate data re-handling and free up office staff to perform more valuable tasks.
- Managers can report upon time spent by block and by phase as the work is occurring, when they still have time to respond to the information.

Bring Your Business to a Whole New Level of Efficiency and Accountability with Caribou's Logger's E-Time

Logger's E-Time is web-based, so field workers can use a laptop, iPad, or other tablet to enter their daily time from their crew trucks or from home. They just need an internet connection and login credentials.

⇒ Workers select entries such as blocks, equipment, and activities from drop-down lists that are integrated with the Logger's Edge.

⇒ Once supervisors approve time sheets, they appear in your Logger's Edge database automatically. Office personnel can still make corrections and process the time sheets as usual.

Time Sheets
