

Suzie Logger : Electronic Load Tracker

*It's Time to Get Rid of Loader Log Books:
Introducing Suzie Logger — Your Paper Log Book Replacement*

Caribou's Suzie Logger software is an application that runs on any Android phone or tablet and serves as a replacement for a loaderman's handwritten log books. Log load data are stored in the handheld and can be delivered to the office electronically at any time.

You no longer have to decipher a loader's cryptic handwriting that often looks worse than a doctor's handwritten prescription.

With Suzie Logger, you can be sure that **every** log load your men have loaded is recorded, making the task of reconciling with your Mills much easier and more accurate.

LOADER'S LOG BOOK PAGE: 1

LANDOWNER'S NAME: Lee James Estate LOADER - MAKE & MODEL: CAT 101

LOAD #	DATE/TIME	PARTS	PRODUCT	DESTINATION	LOADER'S NAME	DRIVER'S SIGNATURE
1	10/1 7:30	JD	Pulp	MANST	BJ Oakley	Mark Ryan
2	10/1 9:00	JD	Pulp	MANST	BJ Oakley	J.D. Stealy
3	10/1 10:20	JD	CNS	Franklin	BJ Oakley	Robert Jeffrey
4	11:15	JD	Pulp	MANST	BJ Oakley	Mark Ryan
5	12:10	JD	CNS	Franklin	BJ Oakley	J.D. Stealy
6	1:30	JD	CNS	Franklin	BJ Oakley	Willie Buck
7	2:15	JD	Pulp	MANST	BJ Oakley	Tommy Shull
8	4:00	JD	CNS	GREENW	BJ Oakley	Robert Jeffrey
9	4:30	JD	CNS	GREENW		Mark Ryan
10	10/1 7:30	VER	CNS	Franklin		Tommy Shull
11	8:45	VER	CNS	Franklin		Willie Buck
12	9:37	VER	CNS	MANST		J. Stealy
13	11:30	VER	Pulp	Franklin		Robert Jeffrey
14	1:45	VER	Pulp	GREENW		Michael O'Grady

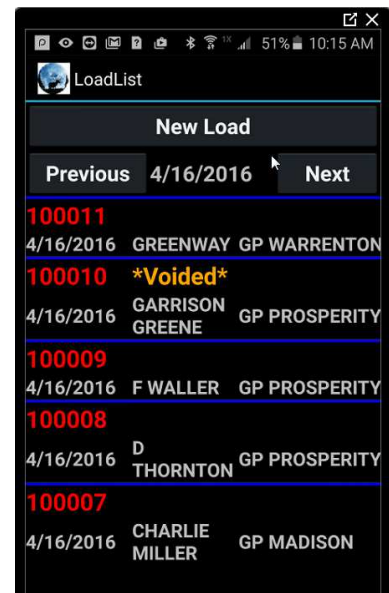

Eliminate Re-Keying.

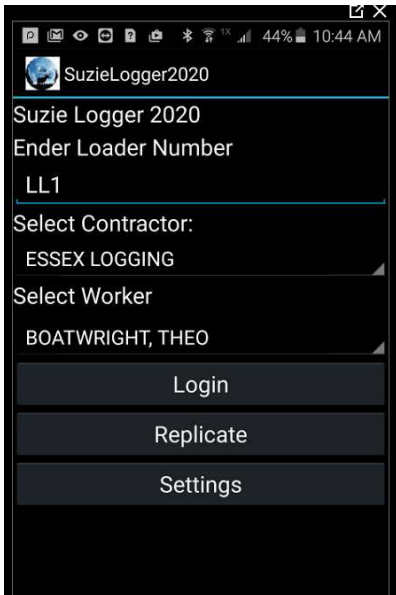

In Suzie Logger, load data are only ever entered once. The data entries are made from "pick" lists that you define beforehand. For example, if you are only loading Chip 'N' Saw and Pulp, you set up those entries and they are the only selections available for the loader.

With Suzie Logger:

- **No 'Lost' Loads**
- **No Re-keying Tickets**
- **Less Paper**
- **More Accuracy**
- **More Security**

Electronic Tickets

Data Transfer. The load data is stored in a database on the handheld and can be passed to the office through several means. These include:

- A Wi-Fi connection to a wireless hotspot
- A cellular modem (for those handhelds with cellular modems)

Load Verification and Analysis. The date and time of each load is captured and posted to the electronic load ticket. The date/time can be used to calculate your truck cycle times if you manage the log hauling phase.

In addition, handhelds equipped with a GPS receivers (like the Trimble above) will post the GPS location to the load ticket. This provides a way to verify that each load is actually loaded from the tract where the loader is assigned.

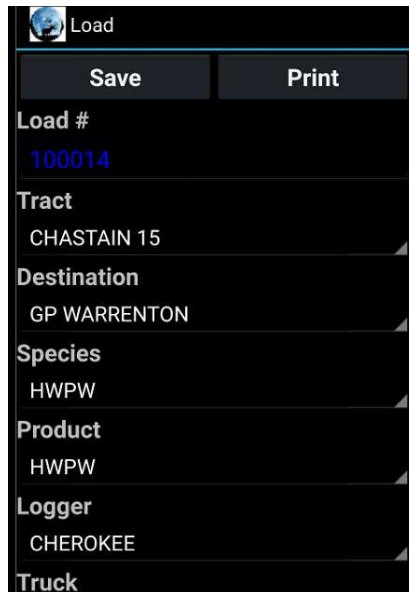

Data Security. Suzie Logger enforces data security. The handheld stores all load tickets for a full season. You can always retrieve every ticket created by your loader.

Tickets can be edited, but edits are restricted after a ticket has been printed. Tickets can be voided, but even these tickets are stored and are easily retrievable. The loaderman cannot delete a load from the system. As noted above, the GPS and Date/Time stamp provide a complete activity history.

Ticket Printing: The handheld can use a Bluetooth wireless connection to print a trip ticket to send with the driver to the mill.
