

Caribou Chronicles

Giving you the *Edge* in Business

SPRING 2024 NEWSLETTER

Pivot Reports

Imagine having the power to effortlessly summarize, manipulate, and extract valuable insights from your raw data in seconds.

Pivot Table Reports, combined with our custom Caribou Views, allow you to do just that and more, making complex data analysis a breeze. You can drill down into specifics, filter by variables, and gain unparalleled clarity into your business operations. [Click this video link to see how pivot reports work.](#)

Posting in The *Loggers Edge*

Once you're done processing revenue and/or pay in The Logger's Edge, you can "post" the statement/invoice so that all transactional information associated with it is locked down. This includes Time Sheets, Loadslips, Expenses, etc. This is a safeguard to protect from inadvertent editing of data that has already been finalized. If revenue/pay needs to be corrected, we also have a correction and reversal process that works well in conjunction with posting.

If you are interested in using any of the features outlined here, feel free to send us an email at support@caribousoftware.com.

Rate Sheets

Rate sheets allow you to create and manage sets of rates that can be reused across multiple blocks. Each rate sheet can be given a name for easy identification of its purpose.

For instance, if you need to apply fuel adjustment rates to various blocks, you can organize your fuel adjustment rates in a single rate sheet and then reference that rate sheet from different blocks. This saves you from having to repeatedly set up or modify the same fuel adjustment rates for each individual block.

This feature is available at no cost, but it requires activation in your database by a Caribou representative. Additionally, some training may be beneficial to fully utilize this feature.
