

Caribou Chronicles

Giving you the *Edge* in Business

SUMMER 2024 NEWSLETTER

Auto Backups

Instead of doing manual backups, ensure the safety and security of your valuable data by setting up autobackups for your Logger's Edge and Contractor's Edge databases.

A Caribou representative can help to assist you in getting these backups manually configured, so you never have to worry about data loss or disruptions. Protect your business today by making autobackups a priority!

If you access the Logger's Edge through the AWS cloud, you already have autobackups configured!

Filtering Tips

Navigating and finding certain data in Logger's Edge can be much simpler with the [4 tips detailed in this video](#).

The video covers sorting, grouping, drop-down filtering and searching.

Logging by Numbers

Read our entry in the Canadian Forest Industries article: [Logging By Numbers](#). Many thanks to SPF Forestry in La Crete, Alberta, and Hec Clouthier and Sons in Pembroke, Ontario for making this article possible!

Imports

Most mills these days can provide you with Excel files containing your loadslip information. You can save a considerable amount of time by importing the loads directly into the Logger's Edge with just a click of a few buttons.

As one of our users in Georgia said recently: **"We only import about ¼ of our total tickets, but if we didn't import and had to return to manual entry, We'd lose a couple hours every week, at least!"**

If you'd like to learn more, a Caribou Representative can provide more information.

Track Truck/Equip. Expenses

You can use the logger's edge to track and report on fuel, insurance, repairs and purchases for your trucks & equipment. Reporting will combine this information with hourly and load detail to provide an accurate cash flow for them as well. [Watch this video on how it works](#).

If you are interested in using any of the features outlined here, feel free to send us an email at support@caribousoftware.com.

TIMBER TITANS:

DUZ CHO CONSTRUCTION

&

FREYA LOGGING

Duz Cho Construction and Freya Logging both got featured in episodes of Timber Titans, which showcases logging companies in British Columbia.

“Duz Cho is one of the largest logging companies in the province, with a massive fleet of trucks and heavy logging equipment.”

“Freya is guided by the principles of sustainability and a desire to drive change. “

[Click here to watch their episode seeing just how well they respond to challenges in the woods.](#)
